

System Hardening Patch Management User Manual

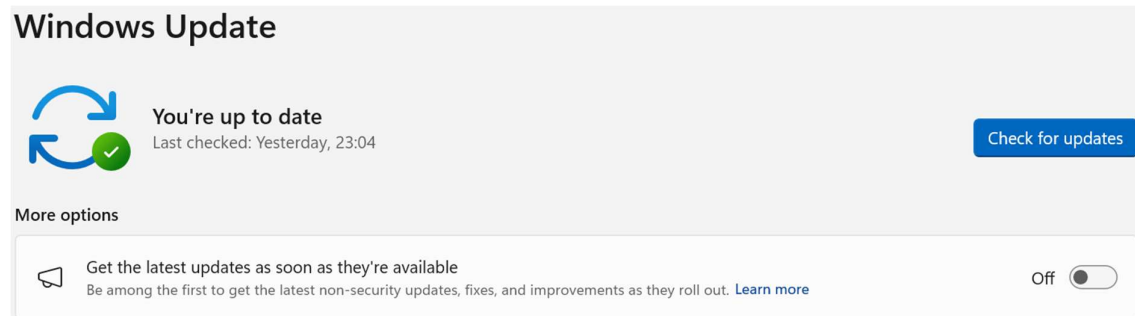

Version 1.0

Revision History

Version #	Date (DD-MMM-YYYY)	Details of the Changes	Modified By	Reviewed & Approved By
1.0	08 Apr 2024	First Release	Manu Mitragotri	Sridhar Reddy

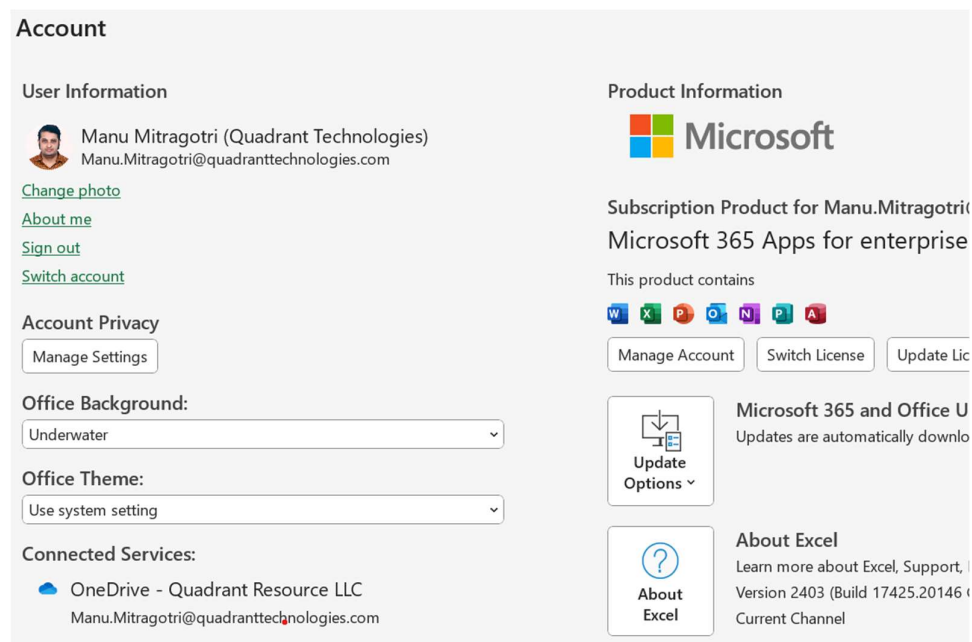

Windows Updates

Search for “**Check for updates**” to open the Windows Update window and click on “**Check for updates**” to check for pending Windows updates if applicable and install them.

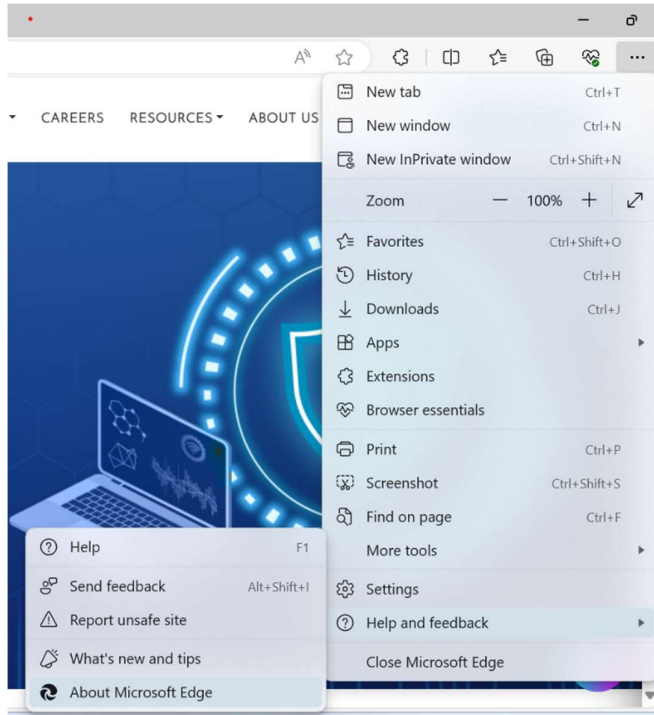

Microsoft 365 Apps for enterprise

Open MS Word or Excel and click on “**File**” option and go to “**Account**” which can be seen at the bottom left-hand side. Then click on “**Update Options**” on the right-hand side and click on “**Update (Check for and apply updates)**” now.

Microsoft Edge

Click on the 3 dots on the right-hand side and follow the screenshot below to go to “**About Microsoft Edge**” to get it updated.

About

 **Microsoft Edge for Business**
[Learn more about Microsoft Edge for Business](#)
Version 127.0.2651.105 (Official build) (64-bit)

 Microsoft Edge is up to date.

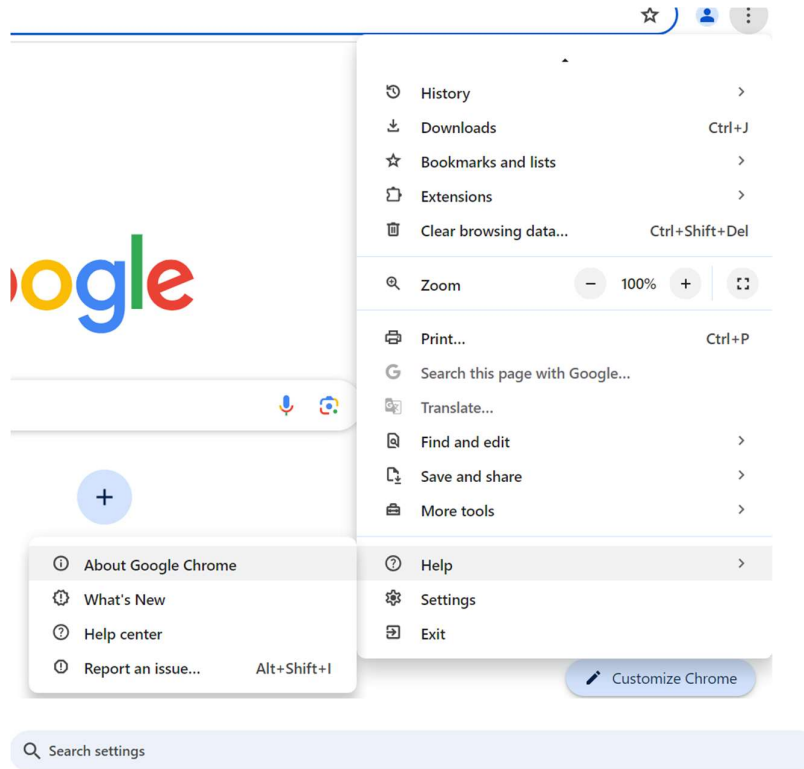

Download Updates over metered connections

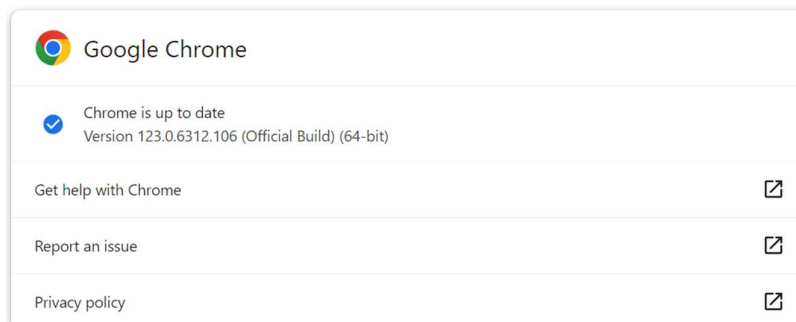

Automatically download updates over metered networks (for example, cellular network) and apply them on browser restart. Charges may apply.

Google Chrome

Similarly for Google Chrome if installed on your system go to the 3 dots on the right-hand side and follow the screenshot to get it updated.

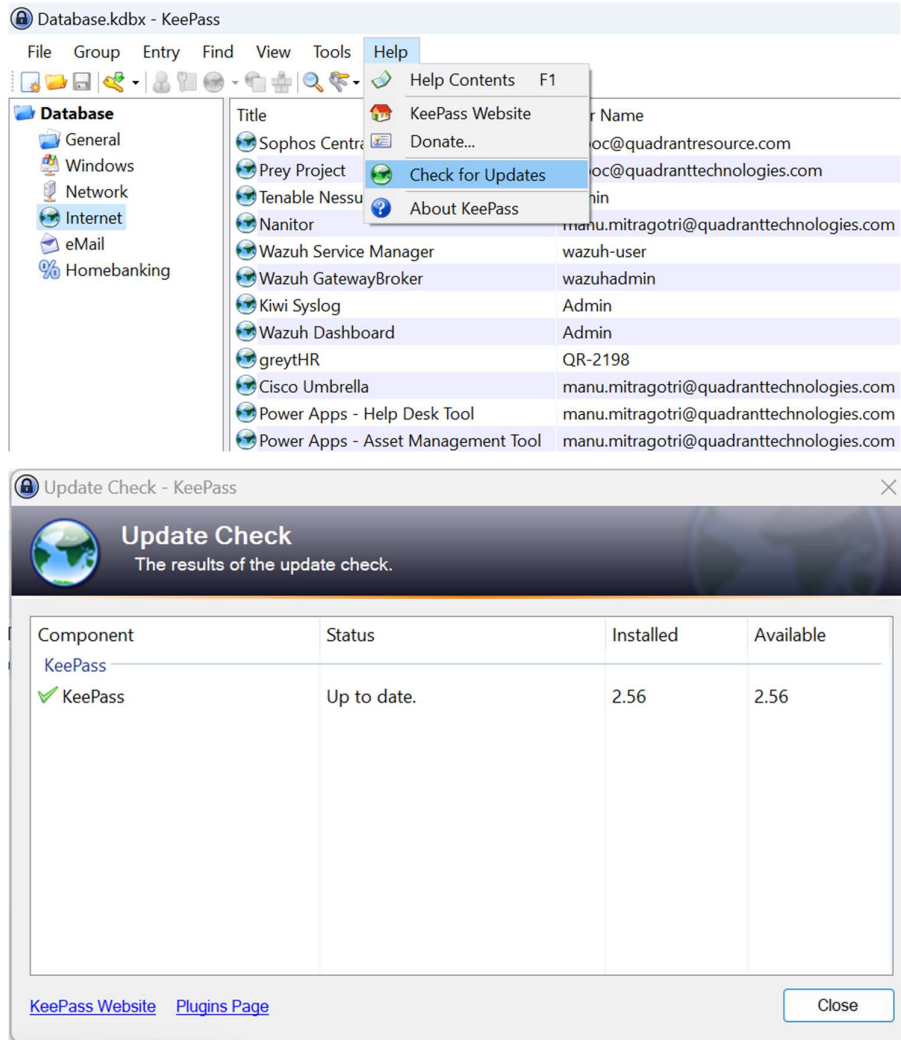

About Chrome

KeePass

Click on “**Help**” and then click on “**Check for Updates**”.

The screenshot shows the KeePass application window with the 'Help' menu open. The 'Check for Updates' option is highlighted. Below this, the 'Update Check' dialog is displayed, showing the results of the update check.

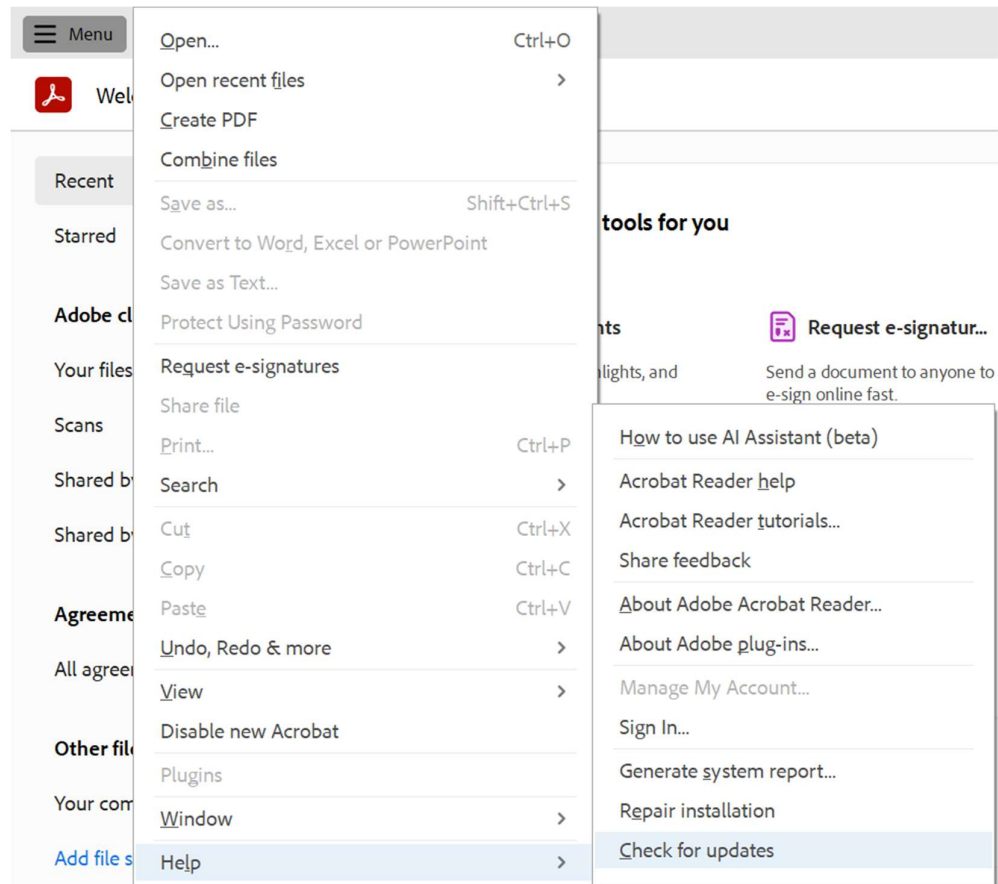

Update Check
The results of the update check.

Component	Status	Installed	Available
KeePass	Up to date.	2.56	2.56

At the bottom of the dialog, there are links for [KeePass Website](#) and [Plugins Page](#), and a [Close](#) button.

Adobe Acrobat

After opening Adobe Acrobat click on “**Menu**” option to follow the screenshot to check for updates.

Microsoft Teams Desktop App

The desktop app automatically updates (so you don't have to). If you want, you can still check for available updates by selecting the settings and more menu next to your profile picture at the top right of Teams, and then selecting Check for updates.

The web app is always up to date. It's just good like that.
